

THE **GLOBAL** PLAYER

Newsletter **3/2020**

Summary of the year
in **VTS Group**

▶ Foreword

Ladies and gentlemen,

I invite you to read this year's last edition of our corporate newsletter.

The year 2020 was certainly different from previous years. The development of the COVID-19 pandemic worldwide made it necessary to adapt individual areas of the company to operate in changing and unpredictable conditions. The task was not easy, but it was successful. We have maintained continuity of production and supply in all markets, and the lead times have remained unchanged.

In the New Year I wish you a lot of health and strength to overcome everyday difficulties, as well as optimism and hope for a better tomorrow.

Have a pleasant lecture.

Hanna Siek, VTS Group President.

Sales promotion and support

Check our shops

Observing the dynamic growth of filter sales for VTS air handling units in the ecommerce channel, in 2020 the company extended its range with spare parts for VENTUS AHUs.

This option was launched in the Europe shop, and will be extended to other markets in 2021.

Our eShop currently offers the following products:

- individual filters and filter sets for specific units
- fan units
- water exchangers
- frequency inverters
- controls equipment

We hope that the ease and safety of shopping, especially nowadays, will meet with a positive response from customers.

20 YEARS VOLCANO

For the VTS, the year 2020 is special for many reasons, including the fact that the VOLCANO water heater has already been on the market for 20 years, of which we are very proud. What's more, this very year we sold a millionth unit of the heater!
